Pass state law to allow domestic pet skunks

Please support a new bill to legalize the ownership, breeding and selling of domestic pet skunks in Illinois.

I have waited for 16 years for these to be legal in Illinois. Please legalize domestic skunks.

There is currently a rabies vaccine in Canada - imrab3 - approved for the use with skunks, thus rabies is not a valid concern any more than it is with dog and cats.

Ken Walker

Paxton
