3.125 (a)

FACILITIES, GENERAL.

3.125 Facilities, general. a) Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Ranch Seco Facility: Primary enclosure gates for the eland and Oryx: According to the caretaker, a vehicle damaged the double chain link gates at the entrance to the compound. Gates are sprung in the middle (where the chain was connecting the two gates). The braces were separated from the chain link portion (an about one foot wide by two feet high triangle). Where the two gates meet, there is a gap at the center bottom of about 18 inches by several feet. A plastic crate was put there to block animals from escaping (ratites). The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury. The gates need to be repaired so that they close properly and have integrity.

The repairs are to be completed by January 20, 2008
